

NetworkRinterface::predict

```
graph LR; A[NetworkRinterface::predict] --> B[NetworkRinterface::inputSize]; A --> C[NetworkRinterface::outputSize];
```

The diagram illustrates a branching relationship. A single box on the left, labeled 'NetworkRinterface::predict', has two arrows pointing to two separate boxes on the right. The top box is labeled 'NetworkRinterface::inputSize' and the bottom box is labeled 'NetworkRinterface::outputSize'. The left box has a gray background, while the right boxes have white backgrounds.

NetworkRinterface::inputSize

NetworkRinterface::outputSize
