

*Neuron::setWeight*

```
graph LR; A[Neuron::setWeight] --> B[VecCon::setWeight]; B --> C[Container< Con >::size];
```

The diagram illustrates a sequence of three operations. The first operation, *Neuron::setWeight*, is highlighted with a gray background. A blue arrow points from this box to the second box, *VecCon::setWeight*, which has a white background. Another blue arrow points from the second box to the third box, *Container< Con >::size*, also with a white background. All boxes have a black border and contain text in an italicized font.

*VecCon::setWeight*

*Container< Con >::size*
